

Web App Manifest “Cheat Sheet”

Example Manifest

```
{
  "name": "Mall-wear -- A Shopping App",

  // shown if there isn't enough space for the full name
  "short_name": "Mall-wear",

  "description": "An app that provides clothing to shopping centers.",

  // What page gets loaded when the app is served
  "start_url": "main.html",

  // Hide the web-browser's UI.
  // This can also be fullscreen, minimal-ui, or browser.
  "display": "standalone",

  // The color to use before the app loads. This prevents
  // a white flash on startup as the stylesheet loads.
  // #f00 is a way of writing "red"
  "background_color": "#f00",

  // Browsers often use this for the color of the address bar
  // or the bar with the time at the top of the screen.
  "theme_color": "#f00",

  // Only works on Chrome/Android
  "orientation": "portrait",

  // There should be at least two icons:
  // a 192x192px icon and a 512x512px icon
  // Safari icons need to be specified separately,
  // with <link rel="apple-touch-icon" href="./icon-192.png" />
  "icons": [
    {
      "src": "/icons/icon-512.svg",
      "type": "image/svg+xml",
      "sizes": "512x512"
    },
    {
      "src": "/icons/icon-512.png",
      "type": "image/png",
      "sizes": "512x512"
    },
    {
      "src": "/icons/icon-192.png",
      "type": "image/png",
      "sizes": "192x192"
    }
  ]
}

// Don't forget to link the manifest to the HTML page!
// Add <link rel="manifest" href="./manifest.json" /> to
// the HTML <head></head>
```
